SUMMARY

Web Developer (CMS & Front-End Focused) with 1+ year of experience delivering 200+ website projects including new builds, rebuilds, upgrades, change requests, and reworks. Experienced in high-volume production environments with consistent on-time delivery and strong quality assurance standards. Skilled in Duda CMS, HTML, CSS customization, responsive design, and client requirement implementation.

WORK EXPERIENCE

Web Designer – eClerx Philippines, Inc.

Nov 2024 – Present

- Delivered 200+ website projects including new builds, rebuilds, upgrades, and reworks.
- Managed high-volume website production while maintaining on-time project completion.
- Implemented custom HTML and CSS solutions beyond default CMS components.
- Performed detailed quality assurance (QA) checks to reduce revisions and improve approval rates.
- Executed client-requested changes while maintaining design consistency and responsiveness.
- Collaborated with project managers and designers to implement technical and design requirements.
- Selected as 1 of 10 out of 60 developers to receive AutoPass status for consistently delivering quality-approved work without requiring internal QC review.
- Designed and customized websites tailored to clients' business requirements and branding objectives.

Mobile Frontend Developer Intern – BlastAsia, Inc.

Sept 2024 – Oct 2024

- Enhanced mobile components using Flutter and Dart to improve user experience.
- Incorporated Figma design specifications to maintain design consistency during development.
- Practiced Scrum/Agile methodologies, participating in daily stand-ups and sprint planning.

Quality Assurance Tester Intern – BlastAsia, Inc.

Oct 2024

- Collaborated with the QA team to perform manual project testing, identify and document bugs, and improve software quality.
- Conducted manual testing, bug tracking, and reporting to ensure application reliability.
